

# Missouri SWMD District Annual Report

Member: District C - Northeast Missouri Solid Waste Management District

Year: 2014

Cycle: Fiscal Period: July 1st - June 30th

## SOLID WASTE MANAGEMENT DISTRICT ANNUAL REPORT

**1 (a). What waste goals did the district have for the fiscal year period and what actions did the districts take to achieve these goals?**

The district had worked with to sub-grantees this year that worked with young people. Both grants involved school aged children and increased their knowledge about what happens to materials after they reach the end of their purpose and what can be done to reuse the material.

**1 (b). What waste goals does the district have for the upcoming fiscal period and what actions does the district plan to take to achieve these goals. Please include the types of grant proposals that will be sought for the upcoming period to assist in meeting these goals.**

The district intends to continue to encourage local entities to increase the recycling opportunities in a very rural part of the state. We do this by continuing to support their efforts through grant funds.

**2 (a). What recycling goals did the district have for the fiscal year period and what actions did the district take to achieve these goals?**

	GOAL:	ACTION:
1	Glass collection in Northeast Missouri is non-existent and the District recognizing this determined to pursue this type of project.	District staff worked with the City of Kirksville, Ripple Glass, and Advanced Disposal to develop plans for a glass collection facility that would serve the surrounding counties.

**2 (b). What recycling goals does the district have for the upcoming fiscal year period and what actions does the district plan to take to achieve these goals? Please include the types of grant proposals that will be sought for the upcoming period to assist in meeting these goals?**

At this time our District has only 1 community that offers curbside recycling and two of our six counties offer no drop-off sites. Staff will work to encourage more options for those areas not currently being served. The staff will continue to work with the City of Kirksville on the glass collection project. At this time there are no special event collections being conducted in the district and staff would work to provide containers as a plan implementation project. Grants that would be used for start up of these programs would be sought.

**3 (a). What resource recovery goals did the district have for the fiscal year period and what actions did the district take to achieve thee goals?**

To increase the recycling rates in the district. Four grants awarded in FY2014 supplied much needed equipment that increased recycling efforts and one grant was award that is constructing a recycling center in a community were there is currently a limited drop off trailer.

3 (b). What resource recovery goals does the district have for the upcoming fiscal year period and what actions does the district plan to take to achieve these goals? Please include the types of grant proposals that will be sought for the upcoming period to assist in meeting these goals.

The District will focus on implementing recycling opportunities in areas that current have none.

#### 8. Describe your district's grant proposal evaluation process.

Each applicant is given a guidance document which contains the required ranking criteria. Staff members check all grant applications to make sure they are complete. Once the grant call is closed copies of all grants are distributed to board members along with copies of the guidance document that explains grant and application rules. Board members are instructed to familiarize themselves with the grant applications before the board meeting in order to be prepared to discuss the proposed projects. During the board discussion at the meeting staff may be instructed to contact the applicant if clarification is needed. Once discussion has ended, ranking sheets are completed, and the board votes on eligible applications.
